Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

Applicant's election without traverse of Group I, claims 49-68 and 100-119, drawn to a polynucleotide, a kit thereof, and an array thereof, in Paper No. 44, filed 3-20-03, is acknowledged. However, upon reconsideration, the following restriction requirement has been substituted for the restriction requirement filed 2-25-03 (Paper No. 42).

#### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 49-68 and 100-111, drawn to a polynucleotide and kit thereof, classified in class 536, subclass 23.5.
- II. Claims 112-119 drawn to an array, classified in class 435, subclass 6.
- III. Claims 120-122, drawn to antibody, classified in class 530, subclass 387.9.

The inventions are distinct, each from the other because of the following reasons:

Groups I, II and III are unique products, being drawn to a polynucleotide, an array, and an antibody, respectively. Groups I/II and III differ with respect to their physicochemical properties being drawn to a nucleotide and an antibody, respectively, and are therefore patentably distinct. Though Groups I and II both encompass nucleotides, Group II, which is drawn to an array, encompasses multiple polynucleotides, while Group I recites an isolated polynucleotide. Therefore, Groups I and II are patentably distinct, as further evidenced by their distinct classification.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, and because a search in the non-patent literature of any of these distinct inventions would not be co-extensive with a search of the others, an examination and search of two or more inventions in a single application would constitute a serious undue burden on the Examiner, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
